## Professional Summary

Software Engineering graduate with hands-on Python backend experience across Flask, Starlette, FastAPI, and Odoo. Worked on backend APIs, banking service integrations, asynchronous processing with Celery and Kafka, and AI applications including OCR and document retrieval. Familiar with SQLAlchemy, PostgreSQL, and React through professional work and personal projects. Focused on clear, maintainable code, problem solving, and continuous technical learning.

## Technical Skills

**Languages:** Python, Java, JavaScript, TypeScript

**Backend:** FastAPI, Flask, Starlette, Odoo, SQLAlchemy, REST APIs, Celery

**Databases:** PostgreSQL, MySQL, Microsoft SQL Server; MongoDB, Qdrant

**Frontend:** React, Redux Toolkit, HTML/CSS, Tailwind CSS, Material UI

**Messaging and Tools:** Kafka, WebSocket, Git, Docker, CI/CD pipelines

**AI Development Tools:** OpenAI Codex, Google Antigravity

**AI Applications:** LlamaIndex, Ollama, RAG, embeddings, prompt design, YOLO, VietOCR

**Cloud and Authentication:** AWS basics (RDS, S3, SQS, Lambda), OAuth integrations, JWT

## Professional Experience

### Fresher Backend Developer

Jun 2025 – Jul 2025

*Mitek*

*Ho Chi Minh City*

- Built a document ingestion and retrieval prototype using LlamaIndex and Qdrant for internal queries.
- Integrated local language models through Ollama to generate responses using retrieved documents.
- Developed a basic internal AI agent prototype and explored embeddings, prompt design, and RAG workflows under mentor guidance.

### Backend Developer

Feb 2025 – May 2025

*ATOM Solutions*

*Ho Chi Minh City*

- Built and maintained Python backend APIs using Starlette and SQLAlchemy, integrating third-party banking services and internal tools.
- Worked on Kafka message processing and Celery background tasks for asynchronous execution.
- Investigated and fixed issues in Odoo modules, including modules deployed to banking staging environments.
- Collaborated with mentors on payment processing workflows and learned unfamiliar technologies through assigned development tasks.

### Backend Intern

Sep 2024 – Nov 2024

*Concentrix Viet Nam*

*Ho Chi Minh City*

- Collaborated with an AI team on a KYC system for Vietnamese ID cards, combining YOLO field detection with VietOCR text extraction.
- Developed and deployed Flask backend services for real-time OCR inference and structured data extraction.
- Contributed to model fine-tuning using more than 1,200 annotated ID card samples and supported evaluation metrics and dataset pipelines.

## Selected Projects

---

### Mail Management Service

*Feb 2026 – Present*

*Personal learning project / Python, FastAPI, OAuth, LLMs, AWS*

- Building a FastAPI backend for email synchronization and processing, integrating Aurinko and Google/Outlook email services with OAuth authentication.
- Implemented LLM-based email summarization and reply composition features.
- Experimented with AWS RDS, S3, SQS, and Lambda for data storage and background processing.
- Exploring backend architecture, asynchronous workflows, and cloud infrastructure through ongoing implementation.

### Social Media Network

*May 2024 – Jul 2024*

*NestJS, PostgreSQL, React, Redux Toolkit, WebSocket*

[github.com/nguyenphucit/facebookClone\\_BE](https://github.com/nguyenphucit/facebookClone_BE)

- Built a social platform with messaging, video calls, notifications, and media sharing.
- Implemented user authentication and real-time chat using NestJS, PostgreSQL, and WebSocket.
- Developed the React frontend with Redux Toolkit and Tailwind CSS.

### Kahoot Clone

*Dec 2023 – Jan 2024*

*Java, Spring Boot, React, WebSocket, Material UI*

[github.com/nguyenphucit/KahootClone\\_BE](https://github.com/nguyenphucit/KahootClone_BE)

- Developed a real-time multiplayer quiz application with live rankings and email verification.
- Implemented quiz session logic, player state management, and real-time score calculation.
- Built the backend using Spring Boot and WebSocket and the frontend using React and Material UI.

## AI-Assisted Development

---

- Use OpenAI Codex and Google Antigravity to support coding, debugging, and learning unfamiliar technologies in personal development workflows.

## Education

---

### Sai Gon University

*Sep 2020 – 2024*

B.S. in Software Engineering

GPA: 8.02/10 | Scholarship for Academic Excellence (2023–2024)

## Certification and English

---

### TOEIC: 940/990

*Issued Dec 2023 – IIG Vietnam*

Strong English listening and reading skills, including comprehension of technical materials.
